

Web and Applications Support

Emergency Management Division
Washington Military Department

Background

The Washington Military Department, Emergency Management Division (EMD) provides Internet and Intranet web and applications development support and advice to the division, state, county and municipal emergency management agencies.

Website Development and Support

The EMD webmaster provides Internet and Intranet website development, design, implementation, and maintenance. The webmaster is responsible for design, development, and implementation of EMD's Internet and Intranet websites during normal periods and during emergencies and disasters for the division.

Applications Support

The EMD Webmaster provides design, development and implementation support and training for the WebEOC application used in the State EOC.

Contact
